Overall Satisfaction with Services

Program Satisfaction: Percent of responses to the question "How satisfied are you with the services you receive?"

Some of the key findings were:

- Overall, 83.0% of the individuals served by Comprehensive Psychiatric Services were "satisfied" or "very satisfied" with their services.
- The percent of individuals served in this region who rated themselves as "satisfied" or "very satisfied" was lower than the state average (81.5% for this region versus 83.0% for the state).
- The Non-CPRC consumers rated the program higher than other groups (83.1% with at least a "satisfied" rating).
- The lowest satisfaction was in the CPRC program, where 79.4% of those served gave a "satisfied" or "very satisfied" rating.

Some of the key findings were:

- The participants in the Comprehensive Psychiatric Services programs were satisfied with the services they received. All ratings were above a 4.00 ("satisfied"). The ratings of this region ranged from 4.18 to 4.43.
- The highest rated item was with the staff's respect of ethnic and cultural backgrounds (mean of 4.43).
- The lowest rated item was the content of the treatment plan (mean of 4.18).
- The Non-CPRC Adult participants were the most satisfied with services (mean rating of 4.38).

Some of the key findings were:

- The quality of life ratings were significantly below the Comprehensive Psychiatric Services service ratings.
- The consumers in this region were most satisfied with how safe they feel in their home (mean of 4.05) and least satisfied with how they spend their day (mean of 3.48).

CPS Comparison of Gender

A comparison was made between the male and female consumers in the satisfaction survey items. Females were more satisfied with the timeliness of services, while males were more satisfied with how they spend their day, the amount of choices they have in their life, opportunities to make friends, their general health care, what they do during their free time, and safety in their home/agency and in their neighborhood. (See Table I-1).

CPS Comparison of Current Living Arrangements

A comparison was made of the satisfaction items based on the current living situation of the consumer. Those who live independently were most satisfied with the staff, that the treatment plan is followed, respect of ethnic and cultural backgrounds, services received and timeliness of services provided. Consumers that lived with their biological parents were most satisfied with the content of their treatment plan, that the treatment plan is being followed, where they live, their general health care, and safety in their home/agency. Consumers residing in a group home were most satisfied with opportunities to make friends. (See Table I-4).

CPS Comparison Between Those Who Lived and Did Not Live in Residential Treatment Facilities

A comparison was made on the satisfaction with services based on whether the individual had lived in a residential treatment facility during the past year. Consumers that had not lived in a residential treatment facility were more satisfied with services while those who had lived in a residential treatment facility were more satisfied with the quality of life items. (See Table I-5).
